Projects

CSBS ([Live](#)) | [GitHub](#)

A flashcard app modeled after [Brainscape](#).

- A Backbone.js front-end is supported by a RESTful Rails JSON API.
- Algorithm implemented in Backbone.js causes more challenging flashcards to appear more frequently.
- Sharing, rating, and public/private functionality for flashcard decks.

Centipede ([Live](#)) | [GitHub](#)

Browser version of the classic Atari game.

- Responsive CSS effects which can be toggled on and off.
- Utilizes a hash to efficiently track all game objects.

cREST ([Download](#)) | [GitHub](#)

Multithreaded REST client for Windows.

- Requests and responses are handled via specially constructed sockets, allowing for extreme responsiveness.
- User can input custom HTTP requests.

Skills

Ruby, Rails, JavaScript, jQuery, Node.js, Backbone.js, Angular.js, SQL, Git, HTML 5, CSS, Python, C++, C, Win32, SDL
